```java
// Assignment-1
package com.anudip.learning;

public class Person {
    String name = "Rahul";
    int age = 25;
    int salary = 50000;

    public static void main(String[] args) {
        System.out.println("Test Successful");
    }
}

// Compile (from the folder containing Person.java):
//   javac -d . Person.java
//   (creates com/anudip/learning/Person.class)
// Run (fully qualified name):
//   java com.anudip.learning.Person
// Output: Test Successful
//
// Classpath error experiments:
// 1) java Person
//    Error: Could not find or load main class Person
//    Caused by: java.lang.ClassNotFoundException: Person
// 2) java -cp /wrong/path com.anudip.learning.Person
//    Error: Could not find or load main class com.anudip.learning.Person
//    Caused by: java.lang.ClassNotFoundException: com.anudip.learning.Person
// 3) cd com/anudip/learning && java Person
//    Error: Could not find or load main class Person
//    Caused by: java.lang.NoClassDefFoundError: com/anudip/learning/Person (wrong name: ...)
// Fix: java -cp . com.anudip.learning.Person
```
