```java
// Assignment-1 (Rectangle area comparison)
import java.util.Random;

public class Rectangle {
    int length;
    int width;

    Rectangle(int length, int width) {
        this.length = length;
        this.width = width;
    }

    int area() {
        return length * width;
    }

    public static void main(String[] args) {
        Random rand = new Random();
        Rectangle r1 = new Rectangle(rand.nextInt(20) + 1, rand.nextInt(20) + 1);
        Rectangle r2 = new Rectangle(rand.nextInt(20) + 1, rand.nextInt(20) + 1);

        System.out.println("Rectangle1 area = " + r1.area());
        System.out.println("Rectangle2 area = " + r2.area());

        if (r1.area() > r2.area()) {
            System.out.println("Rectangle1 > Rectangle2");
        } else if (r1.area() < r2.area()) {
            System.out.println("Rectangle1 < Rectangle2");
        } else {
            System.out.println("They are equal");
        }
    }
}

// Compile: javac Rectangle.java
// Run:     java Rectangle
```
